PLANT AND SOIL

International Journal of Plant Nutrition, Plant Chemistry, Soil Microbiology and Soil-borne Plant Diseases.

Revue internationale de nutrition des plantes, de chimie végétale, de microbiologie du sol et des maladies des plantes en rapport avec le sol.

Internationale Zeitschrift für Pflanzenernährung, Pflanzenchemie, Bodenmikrobiologie und bodenbedingte Pflanzenkrankheiten.

Issued under the auspices of the

"Koninklijk Genootschap voor Landbouwwetenschap"

(*Royal Netherlands Society of Agricultural Science*)

Executive Editors; D. I. Arnon, Berkeley; J. Baeyens, Louvain; F. C. Gerretsen, Groningen; G. W. Harmsen, Groningen; E. G. Mulder, Wageningen; F. J. Richards, London; A. C. Schuffelen, Wageningen; F. Steenbjerg, Copenhagen.

Secretary: G. H. Arnold

Assistant Secretary: J. K. Smit

c/o Institute for Soil Fertility
Groningen, Netherlands

Consulting Editors; Wm. A. Albrecht, Columbia, Mo.; C. Arnaudi, Milan; E. Gäumann, Zurich; L. Gisiger, Liebefeld-Berne; F. G. Gregory, London; A. J. de Groot, Groningen; W. R. C. Handley, Oxford; J. L. Harley, Oxford; J. den Holder, Ghent; V. J. Koningsberger, Utrecht; J. Lavollay, Paris; L. Leyton, Oxford; W. J. Lütjeharms, Bloemfontein; H. Lundegårdh, Uppsala; E. Melin, Uppsala; M. Ødelien, Ås; E. J. Petersen, Copenhagen; C. S. Piper, Adelaide; D. Snow, Reading; H. G. Thornton, Harpenden, Herts.; S. Tovborg Jensen, Copenhagen; A. I. Virtanen, Helsinki; S. A. Waksman, New Brunswick; F. W. Went, Pasadena; L. K. Wiersum, Groningen;

The Editors are - if necessary - advised by experts from the Staff of the Institute for Soil Fertility, Groningen

Druk: Koninklijke Drukkerij Van de Garde N.V., Zaltbommel

CONTENTS — TABLE DES MATIÈRES — INHALT

PAGE

ALBRECHT, W. A., and JONGE, J. DE, Biosynthesis of amino acids according to soil fertility. IV. Timothy hay grown with trace elements 298

BANGE, G. G. J., and GEMERDEN, H. VAN, The initial phase of ion uptake by plant roots 85

BECK, TH., und POSCHENRIEDER, H., Versuche über die Wirkung von Toluol auf die Mikroflora von Böden 346

BEHMER, D. E., and MCCALLA, T. M., The inhibition of seedling growth by crop residues in soil inoculated with *Penicillium urticae* Bainer 199

BJÄLFVE, G., The effectiveness of nodule bacteria 70

BRUINSMA, J., The effect of a spray with 4,6-dinitro-*o*-cresol (DNOC) on nitrogen nutrition and yield of winter rye (*Secale cereale* L.) 1

GREENWAY, H., and ROGERS, A., Growth and ion uptake of *Agrophyron elongatum* on saline substrates, as compared with a salt-tolerant variety of *Hordeum vulgare* 21

HEILMAN, P. E., and GESSEL, S. P., Nitrogen requirements and the biological cycling of nitrogen in Douglas-fir stands in relationship to the effects of nitrogen fertilization 402

HELMY, A. K., HASSAN, M. N., and TAHER, S., Absorption of Na, K, and Ca by barley roots at constant ionic strength 133

HIATT, A. J., *Short communication.* Varietal differences in potassium uptake by excised roots of *Nicotiana tabacum.* . . 273

HOLDING, A. J., and KING, J., The effectiveness of indigenous populations of *Rhizobium trifolii* in relation to soil factors 191

JOFFE, A. Z., Toxicity of overwintered cereals 31

JONES, L. H. P., and MILNE, A. A., Studies of silica in the oat plant. I. Chemical and physical properties of the silica . . . 207

JONES, L. H. P., MILNE, A. A., and WADHAM, S. M., Studies of silica in the oat plant. II. Distribution of the silica in the plant 358

KING, J., Ecotypic differentiation in *Trifolium repens* . . . 221

LARSEN, S., and SUTTON, C. D., The influence of soil volume on the absorption of soil phosphorus by plants and on the determination of labile soil phosphorus 77

MARTIN, G., Différences spécifiques entre les besoins quantitatifs en chlore de *Lemna minor, L. perpusilla* et *Spirodela polyrhyza* 258

MILLER, P. M., and WAGGONER, P. E., Interaction of plastic mulch, pesticides and fungi in the control of soil-borne nematodes 45

MORANI, V., and FORTINI, S., *Short communication.* Sodium in the mineral nutrition of *Avena sativa* 140

MOSS, P., Some aspects of the cation status of soil moisture. Part I. The ratio law and soil moisture content 99

MOSS, P., Some aspects of the cation status of soil moisture. Part. II. The effect of dilution and calcium ions on the release of potassium 114

MOSS, P., Some aspects of the cation status of soil moisture. Part. III. The effect of potassium on a soil system 124

NEWBOULD, P., and RUSSELL, R. S. Isotopic equilibration of calcium-45 with labile soil calcium 239

PASSIOURA, J. B., A mathematical model for the uptake of ions from the soil solution 225

PROCTOR, M. H., Some steps in the degradation of naphthalene acetic acid 338

SCHREVEN, D. A. VAN, Nitrogen transformations in the former subaqueous soils of polders recently reclaimed from Lake IJssel. I. Water-extractable, exchangeable, and fixed ammonium 143

SCHREVEN, D. A. VAN, Nitrogen transformations in the former subaqueous soils of polders recently reclaimed from Lake IJssel. II. Losses of nitrogen due to denitrification and leaching 163

SCHREVEN, D. A. VAN, Nitrogen transformation in the former subaqueous soils of polders recently reclaimed from Lake IJssel. III. The uptake of mineral nitrogen by the pioneer vegetation and the influence of the organic material of the pioneer vegetation on nitrogen mineralization in recently drained polder soils 277

STEPHEN, R. C., and WAID, J. S., Pot experiments on urea as a fertilizer. I. A comparison of responses by various plants 309

STOTZKY, G., and MARTIN, R. T., Soil mineralogy in relation to the spread of Fusarium wilt of banana in Central America 317

SUTTON, C. D., and LARSEN, S., The residual value of fertilizer phosphate applied in two field experiments 267

VOSE, P. B., and JONES, D. G., The interaction of manganese and calcium on nodulation and growth in varieties of *Trifolium repens* 372

WELTE, E., und NIEDERBUDDE, E. A., Die unterschiedliche Bindungsfestigkeit von fixiertem Kalium und ihre mineralogische Deutung 176

WIERINGA, K. T., The humification of high-moor peat. I. Changes in ion exchange capacity and nitrogen contents of the organic matter in high-moor peat 53
